No. 1985—Eighth Year. BUENOS AYRES, WEDNESDAY, SEPTEMBER 23, 1868. Circulation 3000

MAUA BANK,
101-103 CALLE CANGALLO

The offices of this Bank having been removed to the above spacious building, in order to suit the increasing flow of business, the public is informed that the following transactions are carried on in currency and specie in this Bank:—

First—Bills and obligations with good signatures are discounted on conventional terms.

Second—Money is advanced on mercantile and other securities approved of by the Manager.

Third—Accounts current are opened with Merchants or other parties who may prefer depositing endorsed and transferable securities, against which they may draw up to an amount previously convened under conditions established for such class of operations.

Fourth—Money is received in account current, bearing interest from day of deposit, which is accumulated in favor of the parties every three months, the depositors being allowed to retire at any time, by means of cheques, part or the full amount at their wish, save when the quantity exceeds three hundred doubloons or one hundred thousand dollars currency, in which case forty-eight hours' previous notice is required to be given at the Treasury of the Bank.

Fifth—Bills or letters of credit are drawn and taken on Montevideo, Rosario, Sta Fé, Salto Oriental, Paysandu, Rio Janeiro, and other places in the Brazils, England and France, as also on other places, of which notice will be given hereafter.

Finally, the Bank undertakes and executes all legitimate transactions within the orbit of banking operations.

The establishment is always open from 10 a.m. till 3 p.m.

The Company Insures against Fire on very small Premiums. Every class of Buildings and Goods, whether private or industrial.

Goods in Customs Deposit may be likewise Insured.

Insurers in this Company contract no othe obligation than the payment of the stipulater Premium on the Policies, the Company being only responsible for such injuries as they may suffer from Fire.

Among the general conditions of the Policy, there is one of particular advantage to Mortgage Creditors.

The Company offers the following Rewards:—
$f.40 To the first Hose ready to lend assistance.
$f.20 To the second do. do.
$f.20 To the first pipe of water.
$f.4 To each of the five succeeding pipes
Which run to the Fire of any Edifice or Property Insured in THE ESTRELLA, on making known his choice of the Reward, or a Certificate issued by the Police authorities to such as shall have assisted at the mish up.

The Company will also give a Reward of $f.4 to whoever shall present themselves at their Office, to give Notice of any Fire within the Municipal

No. of Policies,.. 2,641 | Securities, $f.838,920·41

It being an admitted fact, that "Money makes money," the object of LA BIENHECHORA could not be better, since it opens a vast Savings Bank for the Surplus or savings of the Public, so that, by the proper employment of these small gains, a moderate capital, or even annuity, may be secured in a short time. By this means a provident, though helpless, family can husband their small means, and, in the end, attain a competency.

It being proved that the accumulation of interest is the most powerful means of augmenting the capital, THE BIENHECHORA DEL PLATA—an Argentine Company, whose only investments are in the country—holds out to Subscribers greater advantages than any other Institution, by reason of all its dealings being in the River Plate, where are current as large interests as in any part of the world.

THE BIENHECHORA DEL PLATA receives Deposits of from Five Patacones per Annum up to any amount in Weekly, Monthly, or Yearly Instalments.

THE WAR IN THE NORTH.

FULL NEWS FROM PARAGUAY.

FILES OF SEMANARIOS.

We have received, per Wasp, full files of the Paraguayan weekly paper called the *Semanario*, which, although the more recent numbers are filled with notes exchanged between the foreign Minister and Mr. Washburn, possess many items of interest for our readers. It is really most amusing to read the different versions of battles which nobody even heard the names of here:—tremendous fights, battles, and victories, on rivers, arroyos, and streams—not one word of which we ever heard of before in this city. As the Press in Paraguay is not free, of course, everything in the papers must be one-sided, and the accounts of the various battles are, as a matter of course, intensely Paraguayan.

The *Semanario* of the 8th August contains a decree awarding to Colonel Bernardino Caballero a grand gold cross for the battle of the 18th July, when, according to that journal, the Brazilians suffered the most terrible reverse.

Doña Escolastica Barrios de Gill, one of the most respected matrons in Paraguay, died on the 3rd August; it appears she played a conspicuous part since the commencement of the war.

A foreigner named Philip Bourse also died the same week, he had been a resident in Paraguay for many years.

The army correspondent under this date charges the Brasilians with cutting up all the trees and plants in the town of Pilar, and sacking the church.

J. F. Lopez, the eldest son of Pres. Lopez, has not been killed as was stated, we note his arrival at Luque, which is now the capital of Paraguay, with his mother Mrs. Eliza Lynch: this young lad was known to most of the English who visited Paraguay as Panchito; he is now an officer in the army.

There is no truth whatever about the arrest of the Bishop, who we read, atttends all the public 'funciones,' &c.

Respecting Berges it is currently rumoured that he has been shot, but there is no proof of it, on the contrary some say he died from the effects of a paralytic attack.

On the 14th of July a decree was published removing Don José Berges from the portfolio of foreign-minister, and ordering his immediate arrest, the the conspiracy was wide spread, and Berges communicated with Caxias through Buenos Ayres. The papers say that the plan was to assassinate Lopez on his birth day, and poison the troops by means of poisoned vines—it was discovered by a soldier,—all the soldiers are true to Lopez, and nothing apparently can seduce them from their allegiance.

As to the arming of the women there is not the slightest doubt, and the *Semanario* speaks in very high terms of two female soldiers who killed a tiger and presented the skin to their commander.

In consequence of the disappearance of M. Pereira, Benitez the minister directed a note to M. Washburn, asking for a list of the parties at his legation; Mr. Washburn sent the following list:—

English—Mr. and Mrs. Eden.
Mrs. Thomas and 3 children.
Mrs. Cutler and 2 children.
Mr. and Mrs. Watts and 4 children.
Mr. Newton and 4 children.
Mr. Miles.
Oriental—Mr. Carreras.
American—J. A. Duffield.
Thos. Caster.
Portuguese—J. M. L. Pereira and wife.
German—A. Brose.

Whereupon Benitez demanded of Mr. Washburn to deliver Sr. Pereira up at once to the authority, which, at Mr. Pereira's request, Mr. Washburn consented to do.

The French Consul, in a very able note to Benitez, completely clears himself of the charge of having advised Mr. Pereira to take shelter in Mr. Washburn's house. It is current now that Pereira is dead but nothing certain is known.

Every Paraguayan soldier who fought on the 18th July, when Osorio was driven back with such loss, has been decorated with a medal.

The history of the late conspiracy is very lengthy and contained in the official notes, in a few days we purpose giving our readers a hasty sketch of the whole affair, the probabilities are that Mr. Bliss has been shot.

On the 24th of December Don José Talavera, the war correspondent of the 'Semanario' died, this talented young man was a good English scholar and his loss is greatly felt.

In June the mother of Gen. Barrios died; Barrios is brother-in-law of the President.

On the 18th of January 1868 our Paraguay colleague published the full particulars of the death of President Mitre, and in a long and well written biographical sketch, gave the leading features of his life: he died on the morning of the 12th, and in the evening his remains were forwarded by steamer to Buenos Ayres—three days mourning in the army—and on the morning of the 13th over 40,000 men prayed for the repose of his soul; the general impression in the army was that the President died from sickness possibly brought on by too much smoking; but others assert that he was killed by a bombshell from Espinito. Marshall Lopez, like a true soldier, ordered his army to respect the mourning going on in the allied camp, and for two days the Paraguayans refrained from firing a shot: the article entitled the "Death of Mitre" is really deserving a translation.

The women work at the saltpetre mines and sulphur springs, and with great success; the women also do all the farming work in the country, in the month of November 1,066,869 lines were sown with cereals, and 2,250 fruit plants.

On the 25th of November Dn. Pedro Filcot, a French shopkeeper died, and E. Pulet, also French, and V. Monte, a Spaniard, all leaving considerable properties.

On the 20th of July the Portuguese Vice-consul had his passports sent to him.

On the 24th of July the Bishop was named grand officer of the Order of Merit.

On the same day Dr. Stewart was promoted to the rank of General Inspecting Surgeon. In a subsequent paper we find that General Hornos, Vidal, Almarez, Mansilla and Barnastai accompanied the corpse of President Mitre to the Paso de la Patria, where they experienced great difficulty in getting across, the coffin very nearly falling into the river.

Captain Michel, of the Doterel, Mr. Thompson, M. Cuverville, French Consul, J. Taylor, Dr. Skinner, and several other foreigners, have been decorated with the Grand Order of Merit.

Lopez's palace is finished, but the furniture never arrived out from Europe.

LATEST FROM ROSARIO.

September 19, 1868.

The late Rosario correspondent some months ago, commented on some tunnelling operations being carried on at the Barraca del Progreso; these were discontinued when seventeen metres in length. This property is now jointly owned by Sr. Cabral of Rosario, and Sr. Suiberon of Buenos Ayres, who have determined on considerably extending the excavation at the present time, and purpose making similar improvements at a later period. An American citizen connected with the Railway, superintended the former works, and the extension of them begun on the 12th. inst., is likewise under his supervision. The tunnel to be thirty-seven metres in length, six in width, and five in height, and cut out of tosca and earth of such st rength and rigidity as to require no brickwork; will be connected by a shaft with a warehouse on the natural surface of the earth, used for the storage of goods. This shaft, whose dimensions are to be 18 x 6 x 2 metres will be supplied by a double acting lift. It is, anticipated that more will be lowered than raised, hence, the lift will be to a great extent self-acting; but as a preparation against the insufficiency of the laws of gravity, a hoisting machine is to be provided which will raise goods of a ton in weight, in addition to any quantity raised by the greater weight of descending matter.

Throughout the repository for merchandise and tunnel rails are to be laid for waggons, to facilitate the arrival and departure of goods, and, in the latter case, the tramway is to extend to the edge of the wharf, alongside which, such is the depth of the water, as to allow any sized vessel to be loaded or discharged. It is confidently expected, if no unforeseen accident occurs, that this extensive improvement will be completed in six months. There is no doubt of the utility of this undertaking, which speaks highly for the enterprising men who go to a great expense, will reflect great credit on the gentleman who undertakes the engineering responsibility, will be of immmense benefit to merchants and captains, and should be as much a pecuniary as any other success to the proprietors:

Not long since the stoppage of the telegraph works, was referred to, a suspension arising from lack of palms for posts. A cargo of palms lately arrived, and the work was recommenced last Monday (14th). The line was first begun about a league distant from Rosario; it is now being brought into the station. On the completion of this section the work will be resumed near Leones.

The Municipality have laid a tax on butchers or others who have animals killed for food at the public corrales: for each pig killed 160, for each ewe or capon 10, and for each lamb 5 centavos fuertes are to be paid.

Apparently the financial position of this body is not the best; a deferential suggestion is made, that it should turn its attention to dogs; a canine impost might be lucrative to the Municipality and certainly agreeable to many residents. The dog nuisance here, is worse than in Buenos Ayres, one cannot walk out after dark without frequently being surrounded by a pack of huge mongrels; true, there are not many instances of people being injured by them, their delight is rather to bark than bite, but their presence is a great annoyance; they are little or no protection from thieves, as is continually proved, and their absence would be generally satisfactory. Within the past few days, there has been an increase in the shipping trade here. The Dutch brigantine 'Texel' leaves this port for Liverpool, in a day or two, with a cargo of produce of the country; ship brokers, Frederickson & Co. A German brigantine 'Rikstiua' is loading produce of the country; brokers, Thomson & Co. The German brig 'Augusta,' and American brig 'Sarah Peters' are loading hay and maize for Paraguay. The German barbue Edw. Pens arrived from Cardiff on the 17th inst. with 589 tons of coal. The American schooner C. Pendleton, and vessel Edward and Eliza are on the eve of being chartered.

P.S.—A few days ago the Café de Siglo was opened in a part of the theatre. Last night it was effectually closed. About eight o'clock a kerosene lamp was broken in the café, and the oil ignited. The result was the total destruction by fire of the entire building in two hours. Some who were in the room at the time state that the disastrous result might have been prevented if the bulk of those in the room had attempted to arrest the progress of the flames, instead of rushing about like lunatics. The natural thought suggests itself that those with cooler heads might have done that which they considered so simple. Soon after the commencement of the fire the commander of the Portuguese gunboat Zarco, which arrived here last Thursday, offered the services of his crew, which, at first rejected, were eventually accepted. These men were useful in cutting away timber to arrest the spread of the conflagration. The authorities, having no fire engine, applied to the railway company for one, which they could not supply. Water was brought in carts after the building was destroyed, which had merely the effect of making the expiring fire burn with greater fierceness. The police mustered very strong, and they imagined they were keeping order. Actually they did nothing of the sort: they made a great noise, and indulged freely in their favourite amusement of prodding peaceful men with bayonets, and cutting their heads open. No doubt the sight was terrifically grand, the heavens illumined far and wide by the devouring element, which shed a light over the capital that excelled in brilliancy the glare of the noonday sun. Having myself seen nothing of the flare-up, vivid imaginations can pile on the agony to their liking. The theatre and adjoining café and store were insured for large sums a day or two before the event; those of a sarcastic turn of mind are pleased to call this coincidence peculiarly fortunate for those interested in the gutted theatre. Under any circumstances the result is as satisfactory as we may expect to have a new building more appropriate to the size of the Capital, and this event will give an additional impetus to the scheme for a new theatre which has been long mooted.

SPHINX.

LATEST FROM MONTEVIDEO.

September 21, 1868.

The conference on public education, announced by Dn. Pedro Varela for last Friday, had a most brilliant success. A numerous and select attendance filled the hall of the Institute, and Sr. Varela pronounced a lucid and brilliant discourse, which was frequently interrupted by the enthusiastic cheers of his admiring audience. He descanted in eloquent terms on the benefits of education, adducing ample examples from the history and practice of the United States, insist upon the obligation of the State to enforce that every child should have the means of education, and concluded with an impassioned appeal to the youth of the Banda Oriental, to take an active part in the educational movement that was so much needed, which, if they did with faith, enthusiasm, and self-denial, would enable the B. Oriental people ere long to say—"We are great, free, and happy, because we are educated."

The propaganda thus happily initiated, promises not to remain a dead letter, and several young men, convinced that the great destinies of their country can never be attained without reforming, by means of the spread of education, the social condition of the Republic, have started the idea of forming a society which, under the name of 'Amigos de la Educacion,' shall strengthen, by a popular element, the imperfect and unproductive action of Government.

Dn. Carlos M. Ramirez, co-editor of the 'Siglo,' has taken a leading part and published a sort of program of the new Society, which abounds in sound and practical views; and, it is hoped, that he may be successful in carrying out ideas, of such vital importance to the prosperity and well-being of the country.

The Decree of the Government, with reference to public lands, to which I alluded a few days back, has created a storm of opposition, as infringing in a glaring manner upon private rights. The 'Siglo' is particularly bitter in its hostility to it.

The Government has officially recognised Dn. Carlos Guillermo Dhiel, as Consul for the German Confederation in Montevideo.

Our popular 'ci-devant' Prussian Charge d'Affaires, M. Von Gulich, is shortly expected to return from Europe, and it is not improbable that he will be invested with a higher character than the one he held before.

A great number of contributions of books, medals, minerals, &c., are almost daily sent in to the Commission of the Public Library and Museum, the members of which are indefatigable in their exertions to raise these institutions to a level commensurate with their great utility.

The great topic of conversation in our fashionable circles, is the ball to be given on Friday next by Colonel D. Faustino Mendez, about which the most marvellous tales are told. It is said that the supper-table, laden with all the most rare delicacies of the season, and the most 'recherche' wines ever tasted, is to be laid in the garden, under a glass roof, and lighted up with lights of every shade of color. The gorgeousness of all the the decorations, and the exquisite taste displayed in all the arrangements, will make the scene vie in splendor with those recorded in the pages of the 'Thousand and One Nights." Among other things there are to be 200 pairs of gloves, and as many pairs of satin shoes, to supply every unforeseen want of the guests. In fact, if half what is reported is true, this ball will form an epoch in the festive annals of the River Plate.

Notwithstanding the activity displayed by the Board of Management of the Ferro-Carril del Uruguay, to hasten all the preparations of its Inauguration for the 4th of next month, it is more than probable that owing to the state of the weather the works cannot be pushed on fast enough, and the ceremony will have to be postponed for a few days. The engine runs now all along the distance from the 'depots' of the Company to the Arroyo de las Piedras, and although from there to the town of that name, there are only three miles, the state of the works is not sufficiently advanced to enable one to anticipate that they will safely allow of the opening to take place on the day above-mentioned; and the Directors would be greatly to blame, if for the sake of a few days, more or less, they should court an accident, through the incompleteness of their arrangements.

A Committee has been formed here for collecting funds for the sufferers by the Peruvian earthquake, who are entirely engaged in carrying out the humane trust confided to them.

There is very little animation on Change to-day, and business is very dull. No operations in exchange are reported. On Saturday at the closing hour, 3000 quintals jerked beef from the Rivers, was sold at 17 reales fts., to be paid in currency. Weather showery and unsettled.

O. M.

EDITOR'S TABLE.

We received yesterday, mails from Montevideo and Rosario. Our correspondent's letters from these two cities will be found in another column. We also received a letter from an occasional correspondent at the seat of war, dated from Gathapé 16th inst., it contains some interesting details, and we regret not being able to find room for it to-day, but will publish it to-morrow.

In their sitting of Monday the Chamber of National Deputies passed the bill sent up from the Senate, recognising the validity of the Spanish claims, with an addition of an article, ordering the liquidation and payment of all analogous claims made by Argentines of Spanish descent. In the same sitting, the bill for an increase of salary to the members of the National Executive, was also sanctioned. By the new law, the President of the Republic is to receive 20,000 patacones a year, the Vice-President 10,000, and each of the Ministers 9,000.

With reference to a petition signed by D. Emilio Padilla, in the name of thirty-five young students of the Santa Fé College, asking that they might be allowed to join the University, and that the public examinations they had already given in the College of Santa Fé might be taken into account, the Government has sanctioned their being admitted to follow the University courses of lectures, after proving that they had competently followed the respective courses in the college of Santa Fé.

The *Eco de Cordova* says, that the news of the proclamation by Congress, of Sor. Sarmiento as President, and Sor. Alsina as Vice President of the Republic, had been well received in the Provinces of the North, and that there was every appearance that the new Government will meet with general support throughout the Republic.

We have been favoured by the Hon. M. Washburn with copies of the whole of his correspondence with the Paraguayan Foreign Office, beginning with a note dated 20th June from Sr. Benitez, the then Foreign Minister, and ending with the parting shot fired by Mr. Washburn at Lopez directly from on board the Wasp on the eve of his departure. We regret that we have no room in our daily columns for this very voluminous correspondence, but we are preparing to publish it in a supplementary form, as it cannot but assist powerfully in opening the eyes of the world to the real state of things in Paraguay. We shall take particular pains to forward a copy of it to the *Times* of London and to the Peace Society.

The Committee of the Athletic Sports Club have resolved to postpone the spring meeting advertised for the 12th October to the 11th of November, in view of the unsettled condition of the weather and the unfavourable state of the ground for training, as well as because it cannot be ascertained whether the 12th of October will be held as a holiday. The prizes to be competed for at the above meeting are now on exhibition at Messrs. Drabble, Brothers & Co., and the following is a list of them:—

Five Electro Silver Cups, chased and plain.
Electro and Gilt Inkstand.
Two Silver Cigar Cases.
One Tortoise Shell Case.
Two Ivory Cases.
Silver Dram Flask.
Electro Glass Flask.
Three Silver Fusee Boxes.
Three Gold Pencil Cases.
One Signet Ring.
Three Maltese Crosses for Champion Medals.

Five or six other prizes remain to be purchased in addition.

We had the pleasure of seeing yesterday, one of the finest if not the finest Negretti ram ever introduced into this country. It belongs to our friend, D. Carlos Casares, and will repay the trouble of a visit. He is at present to be seen at the Caballeriza Casares, in the Calle Mejico near the beach. He comes christened with the name of Borkes, and is out of the Werbelow herd, whose origin is Passow. He is not only remarkable for the fineness and closeness of his fleece, but more particularly for the perfect symmetry and beauty of his forms. This valuable animal that stands to Mr. Casares in little short of 20,000 paper dollars, is destined for his estancia La Verde near Magdalena, but will be allowed a month or six weeks rest in town after his long sea voyage.

We have received a letter from Mr. Powel, relating a very remarkable cure performed by Mr. Douglas, the veterinary surgeon, on a valuable dog that was highly prized by Mr. Powell, but which was stolen from him shortly after being cured. Mr. Powell, while sadly regretting the loss of his faithful companion takes this occasion to bring to the notice of the public the great skill of Mr Douglas as an able and successful veterinary surgeon.

An American gentleman has very kindly favoured us with an extract from an American paper, which gives full particulars of a ten mile trot at Riverside, which fully answers the interrogatories of our Rosario friends on the subject.

The Decidee has passed up to Villa Pilar with a gentleman from the French Legation on board, who goes to look after French interests.

A subscriber who wrote to us from Altamirano Station the other day, about the flooded state of the camps, a paragraph out of whose letter we reproduced, writes to complain of two misprints that make him appear to speak nonsense. The first is, for *cows* read *cars*, as nobody ever heard of a cow cart. And the second is where by the introduction of troop instead of trap, he appears to be the owner of a thing which he unfortunately does not possess.

On the 13th Marshal Caxias took up his headquarters at Villa Franca where the bulk of the Allied Army is at present encamped. The town of Villa Franca is small—it formerly had a population of ten thousand inhabitants; this town may be regarded as nearly half way from the Tres Bocas to Asuncion.

Yesterday afternoon it was currently rumored that President Mitre had vetoed the Capital Bill, and that, consequently, the bill goes again back to Congress. We believe this is the first bill President Mitre ever vetoed.

A private letter from an English gentleman in Paraguay says that Lopez is now about to enter on a new campaign, which we suppose means that Lopez falls back into the interior of the country. All the English and other foreigners are well and strong. Mr. Taylor, who built Lopez's palace, is now making printing paper from a peculiar wood which grows in Paraguay.

CAÑADA DE GOMEZ RACE MEETING.

These races came off with considerable éclat on September 8th, and from the general interest excited by one of the events the "Railway Stakes," and the attendance of so many well known English sportsmen from the Provinces of Cordova and Santa Fé, there can be no doubt that the efforts of the promoters will be rewarded with deserved success, and the Cañada de Gomez Meeting now established and celebrated for the first time, will become one of the greatest attractions to all lovers of the noble pastime in this part of the world.

Unfortunately several unforeseen causes prevented three of the stakes filling; but a number of Englishmen met together to enjoy a day's racing, are not easily debarred from attaining their object.

A Sweepstakes of 10 Bolivianos each was got up, for which four horses came to the post, Mr. Cookson's Alarm being made first favourite; but some few knowing ones distrusting his temper, stood Rifleman, the second string of the Las Rosas' stable. Their judgement proved sound, Alarm, bolting at the sharp turns, was unable to catch his horses at the finish, and Rifleman, who had been lying off, caught the Malacara three hundred yards from home, and won by three lengths.

The probability of the Indians, who had been over the ground a week before, joining in the sport, did not damp the ardour of our countrymen, who crossed the indian-infested plains, piled their money on the mare with true British pluck: and well were they rewarded for their pains for the way in which she won, steered by the masterly hands of Mr. Reynard, fully justified the confidence placed in both mare and jockey, and made her backers rejoice that so able a successor in the pigskin to Mr. Kennis, (now in his native land,) was to be found in the country. The ground was rather slippery, owing to a heavy storm in the morning, which fortunately cleared up before racing commenced, this in no way altered the running:—The Saucero is a slashing fine horse, and certainly his condition justified the enthusiasm of his backers, who assembled in force, able and willing to lay their money down. Vampiro is a smart, gentlemanly little horse, but with hardly size and stride sufficient to render him a competitor worthy of Bridesmaid. Mr. Reynard, evidently riding to orders, waited with praiseworthy patience till half way round the third time, when he challenged Saucero, headed him in a few strides, and won with the mare pulling double, by four lengths, thus proving beyond all question the ability of Bridesmaid, both to go fast and stay, and if, as we hear is probable, this is her last appearance in public, the stud will have a valuable acquisition, and Santa Fé with the Whirlwind and Bridesmaid cross, will be able to hold its own with even the sister province of Buenos Ayres.

Two races were totally insufficient to satisfy the sporting desires of our countrymen. A subscription was immediately set on foot, and in a few minutes the sum of 60 Bolivianos was collected, which was added to a sweepstakes of 5 Bolivianos each. Six horses put in an appearance; but honest old Rifleman again proved equal to the occasion, and, admirably ridden by Mr. Straubenzee, won easily.

The following is a *resume* of the days' sport:—

Sweepstakes of 10 Bolivianos each.
Weight, 11st. 7lbs.; distance, 10sqs.

Kemmis, Cookson, and Wheatley's Rifleman, ridden by Mr. Reynard	1
Mr. M'Creath's Colorado, by Mr. Bowers	2
Mr. Watt's Malacara, by Mr. Hunt	3
Mr. Cookson's Alarm, by Mr. Straubenzee	0

The Colorado jumped off with the lead, which he maintained to the distance, when Rifleman came in with a rush, and won cleverly by three lengths.

The Railway Stakes,
Of 200 Bolivianos, added to a sweepstakes of 30 Bolivianos each.
Weight, 11st. 7lbs; distance, 30sqs.

Kenniss, Cookson, and Wheatley's Bridesmaid, by Mr. Reynard	1
Mr. M'Creath's Saucero, by Mr. Bowers	2
Mr. M. Correa's Vampiro, by Mr. Ignacio	3

Vampiro made the running at a close pace, Bridesmaid last—this order was maintained until reaching the distance the second time, when Saucero, went to the fore; Bridesmaid, at the same time, collaring Vampiro, and gaining steadily on Saucero. On the far side of the course, about five squares from home, Bridesmaid caught Saucero, now beaten, headed him and won as she chose by 3 lengths. An objection was lodged by Mr. M'Creath against the winner, on the ground of her jockey having carried 4lbs. overweight without declaring: but on examination before the steward it was proved by the clerk of the scale that Mr. Reynard had declared the 4lbs. when weighing out.

A Sweepstakes of 5 Bolivianos each, with 60 Bols. added.
Distance, 10 sqrs.; catch weight.

Mr. Straubenzee's Rifleman, by the owner	1
Mr. M'Creath's Colorado, by Mr. Bowers	2
Mr. Fraser's Grey President, by Mr. N. Wheatley	3

And three others.

This was a fast-run race. Alarm, now ridden by Mr. Reynard, again showed temper: his power of speed is, however, wonderful, and, with careful handling, we feel confident that he will become one of the most remarkable horses the Republic has ever produced.

FRAYLE MUERTO.

IRELAND.

ANOTHER LANDLORD SHOT.

One of the most tragical occurrences that perhaps ever happened in connexion with the land laws, has taken place at Ballycohay, within two and a-half miles of the town of Tipperary, by which one policeman, a steward, and, it is believed, a landlord, lost their lives, whilst three more police and a herdsman have been dangerously wounded. The facts are shortly stated to be these:—Mr. William Scully, of Ballinaclough, within about six miles of this town, lately purchased a property at Ballycohey, tenanted by about a score of respectable tenants, all of whom are tenants at will; and it is stated these people are hard-working and industrious, and always paid their rents with punctuality. It seems that Mr. Scully lately offered to several tenants an agreement which contained, it is stated, the most stringent covenants, by which the tenants were to hold from year to year; and the tenancy was to be terminable by a twenty-one days' notice to quit, in case Mr. Scully deemed it expedient to eject them. The entire tenantry refused to accept or execute such a lease; but it is stated that they were satisfied to pay any additional rent that might be demanded. Mr. Scully, it appears, served some three or four of the tenants, whom he met in Tipperary, with notices to quit, and some time ago he went to the lands, accompanied by two policemen, and succeeded in serving some two or three more of them, but the other tenants, by a 'dodge' escaped service. They left their houses whilst he remained on the land, and as he could find no person in any of the houses on whom to serve them, he had to return, leaving a considerable number unserved.

On to-day, however, he expected to finish the service, He went by train to Limerick Junction, distant about a mile from Ballycohey, accompanied by his steward, a respectable young man named Gorman, and his caretaker, named Maher, and from the junction he proceeded [illegible] he made

also accompanied by eight police fully armed. On making his appearance at Ballycohey he was hooted and groaned by a lot of women and children, who seemingly suspected him. The party first proceeded to the house of a man named Dwyer; on entering the yard they were suddenly fired on from an out house, which had holes in its front wall which answered the purpose of port-holes, and they were also exposed to a deadly cross-fire from the dwelling-house. One of the police named Sub-Constable Samuel Morrow, of Tipperary station, was shot dead; Gorman, the steward, was also shot dead, both expiring almost immediately. Three of the police were also seriously wounded, and Maher the caretaker was also wounded, a ball passing right through his instep; he was conveyed to the Union Hospital this evening. Mr. Scully also received two dangerous wounds. He, it is stated, acted with unusual coolness during the entire occurrence, and with the police returned the fire, but it has not yet transpired whether their shots took effect. The whole party had to retire, leaving their dead after them, but bringing away their wounded.

Mr. Scully succeeded in reaching the residence of Jasper Bolton, Esq., J. P. Ballykisteen, agent to the Earl of Derby, and the first accounts stated him to be lying there in a most precarious condition, but as I write (eight o'clock, p.m.,) later accounts state him to be dead. The first account that reached town was the arrival of two of the wounded policemen about 2.30 p. m. The entire police force off duty were then despatched to the scene of the occurrence, and have not since returned. The three wounded policemen had a most miraculous escape. One of them is very severely wounded from a gun-shot wound in the poll of the head, the other received a bullet in the thigh, whilst the third received a shot under the heart, but the ball glanced off, leaving only a slight flesh wound. Great indignation is felt towards Mr. Scully here, as it is stated he was about ejecting the whole townsland of Ballycohey. He is a very wealthy man, being owner of several extensive properties in this country and the county of Kilkenny.—9.30 p.m. The police have returned bringing with them the dead bodies of Sub-Constable Morrow and Gorman. Mr. Scully is still alive but in a very precarious state: he received three guns-shot wounds. The police state that there could not be less than fifty shots in the volly fired at them on entering the yard. They also state that the people were well armed with guns, and that besides these in the houses, there was also a large number of armed men along the ditches. Only one arrest has been made up to this.

Dublin Evening Post

THE PRUSSIAN BULLET-PUMP.—BALL PRACTICE.

There is something grimly amusing in the fact that at the very time when a diplomatic conference is called to discuss the Russian proposition for the disuse of explosive engines of destruction in war, authorities of the great military states of Europe are expending time and money in the invention and perfection of machinery for the wholesale slaughter of mankind. Here, for instance, is what they have been doing in the royal city of Konigsberg on Monday, according to the *Voss Gazette*:

The officers and sub-officers of the 43rd Prussian regiment were practicing on last Monday with the new infantry gun—called the bail-pump. This gun, which is a breach-loader, rests on a support. In the trial of last Monday a table bound by an iron hoop was used. The rebound is insignificant, for it is deadened by a spiral spring. The gun is composed of 37 barrels enclosed in a common cylinder. Thus it has 12 barrels more than the revolver cannon of France, and it discharges from 222 to 333 shots in a minute. It was tried on Monday last at distances of from 300 to 800 paces. Paper targets placed before baskets of brushwood were the object fired at. At 300 paces the conical bullet, an inch and a half long, passed through the brushwood, and at 800 paces it passed deeply into it.

Some time ago we reported from the French journals that in the ball practice at Vincennes some 30 or 40 bullets penetrated each of the painted men who formed the target for the sharpshooters, and at the present moment further perfection is being attained in the camp at Chalons.

The Russian journals boast of the perfection of their military arms.

The Austrian military authorities are not disposed to remain in the background. The *General Correspondence* of Vienna has the following:—

"In consequence of the change of military tactics introduced by the new fire-arms, greater care is to be bestowed upon the formation of a corps of sharpshooters. For this purpose there has been established at the camp of Bruck, on the Leitha, a practising school under the direction of General Count Auersperg. The Emperor has ordered that the best shots shall receive special distinctions, as in other armies. Those of the first-class in the line regiments will receive red ribbons, and in the Chasseurs, green, which they will wear on the breast in the same way as the decorations of the captain of the gun in the artillery.

THE FLOOD ON THE PATAPSCO.

FURTHER PARTICULARS.

The Baltimore and Ohio Railroad crosses the Patapsco River, nine miles from Baltimore. There can be no continuous travel West by rail from Baltimore for many weeks to come. The destruction of property for twenty miles—as far as heard from on the line of this road west—passes description. The railroad for miles along the Patapsco is swept away. The buse valley is stripped of its bridges, mills, factories, and numerous houses. Those mills which are not swept off are either emptied of their contents or left so high and dry as to be useless for the summer. Every water wheel, mtll stone and spindle not swept off will remain at rest. The flats in sight at this point are dotted with barrels of flour, pieces of machinery and carcasses of animals. Every tree along the banks of the river is torn out by the roots or lying at acute angles entirely stripped of bark. The two iron bridges at Woodstock and the two at Elysville, that at Kennedy's those at Ellicott's and the splendid iron railroad bridge just completed at Ilchester, four miles west of this point, are swept away. The avalon Iron Works are also gone. Sadder than all this is the loss of life. The accounts of dead bodies being found from time to time are sickening. The wife and eight children of Dr. Owens of Ellicott's Mills are among the lost. The body of one of the latter has just been discovered here.

The rain fell in torrents, and the failure of mill dam after mill dam along the narrow tortuous valley of the Patapsco, brought down a volume of water which swept off nearly everything in its course.

Your correspondent's crops are swept away but his family are safe, after being surrounded by water; and he is thankful.

Ellicott's Mills, Md., July 25.
Noon.

I have walked to this point amid scenes of destruction at every step. The loss of life is variously stated, probably from twenty to thirty. The village is strewn with clothes, machinery, &c. At eleven o'clock yesterday the flood was at its height. The railroad train for the West had to be abandoned two miles west of this, where it remains, having been partially submerged. The damage amounts to millions, and thousands of operatives are thrown out of employment I send this from a pocket instrument from the Bankers' and Brokers' Lines, who are energetically repairing their wires. BROWN.

Baltimore, July 25.

The losses by flood yesterday will foot up several million dollars. The following firms are among the sufferers: Heald, & Co's. tannery, $20,000; Denmead & Jones's machine shoop, $5,000; Armstrong & Co.'s soap and candle manufactory, partial; Woods, Weeks & Co.'s sugar refinery, $30,000; Fisher Bros., importers, loss about $10,000 in sugar and molasses; Bentley, Larrabee & Co.'s iron foundry gave way, and the west wall fell, causing a heavy loss. Many private houses were more or less damaged, Also, Warfield & Co.'s monument flour mills. A large quantity of sugar and molasses on the docks was washed away and destroyed. A number of wharves were partially washed away, involving heavy damage. A number of streets are badly damaged, being washed in deep gullies by the current. Nine bridges over Jones's Falls, on different streets, were swept away. At Ellicot City the destruction of life and property is very great. Thirty houses were swept away, some of them containing whole families who were carried with the current and drowned. Several bodies have been recovered to-day at and near the Relay House, about eight miles below Ellicott city.

The following are reported drowned at Ellicott city: William Patterson, wife, and child; Mrs. Farren and two grand children; Fanny and Emma Duvall: Wm. Reeve, wife, son, and daughter; the family of Dr. Owens, and a number of other names not given.

The losses of property at Ellicott city are as follows; Gambrill's lower Patapsco flour mill was entirely swept away, and the upper mill partially destroyed. The Granite cotton mill of Benjamin Deford, some of the walls of which were twenty feet thick, and which cost $160,000, is a total ruin. Gray's large cotton factory was also considerably damaged; and the Union cotton mill, half a mile above Ellicott city, was badly damaged, and much cotton lost. The stores of George C. Bradley and Joseph H. Leisher, with all their goods, were swept away. The Avalon nail and iron works near the Relay House were swept away.

Several days must elapse before an accurate estimate of the loss can be made. The loss of life in Baltimore city is not positively known to exceed four, only that number of bodies being yet found. There is no doubt but that some were swept into the river.

RAILWAY GAUGES.

To the Editors of the *Standard*.

Gentlemen,

Having seen an excellent article in the *Tribuna* of last Saturday on 'Railways,' I beg leave to offer to the author of it, through the medium of your valuable paper, some few suggestions, which appear to me natural to the subject.

The present system of wide-gauge railways was introduced into this country before the people knew how far their power of sustaining a railway system extended, and before they knew practically the best system to adopt.

That railways were required, is proved by the results of those built, but that railways, such as we have, were required to fulfill the duties attendant on the amount of traffic which the country could offer, is still a question, in which I take the negative to be the strongest side.

The present system of railways has cost on an average at least £7,500 sterling per mile, in a country where the engineering difficulties are almost 'nil.'

Therefore the question arises whether we should not have adopted a system which would have effected the same result, with the expenditure of a small amount of capital. I think we should, and that railways of 3ft. 6in. gauge would have been quite sufficient for our present wants. Why, let me ask, should we spend sums now on a few miles of railway, which, although they are useful to us, are much more than is necessary to form a system which could, and would, be sufficient to fulfill all the duties at present performed by the wide gauge expensive system?

We have spent nearly, if not quite, as much as the Government of Queensland to build railways. They have had to contend with extreme engineering difficulties, and construct many costly works, such as in seventy-eight miles eleven tunnels, one of them over one-third of a mile in length, and an amount of bridging and waterway had to be provided, greater perhaps than any seventy-eight miles of railway yet made in any country. These seventy-eight miles cost on an average fifty thousand patacons per mile; and another line in the same country, but through another and easier part of it, cost only 30,000 patacons per mile. But, although an easier part of the country, nevertheless, compared with this, a difficult one, and with very little, if any, difference in the price of labor.

We should here adopt the same system as they have adopted, and the law limiting railway gauge should be at once abolished, especially for the Provinces, where heavy works may be expected. What we require here are light narrow-gauge railways, capable of performing all the duties which the traffic of the country requires, and opening it up from Bahia Blanca to Buenos Ayres, and from Buenos Ayres crossing the Andes, forming a network and opening up the interior Provinces to wealth, progress, and liberty.

I remain, Gentlemen,
Yours truly,
C. E.

ON 'CHANGE.

September 22, 1868.

Ounces,	$400
Sovereigns,	122½
Patacons,	25
National Bonds,	50⅛

National Bonds closed weak to-day. Owing to the new law, authorising the emission of Bonds, every one seemed anxious to sell, but at after hours prices improved, and sales were made at 51, it being confidently asserted that President Mitre had vetoed the 'capital bill' recently passed by Congress. Merchants and others expressed high satisfaction that the President had adopted this course, as on the Bolsa all are in favor of the capital remaining here.

It was very generally said on 'Change to-day that Congress purposes authorising another emission of Bonds for the payment of further Spanish claims, as also the Rosas debt; and it is in consequence of these rumors that both speculators and holders are anxious to realise at even the present market prices.

Exchange has again fallen. Bills on London were passed to-day at 48½, and Exchange on Rio offering at 40$000.

There was a very current rumor on 'Change to-day that another failure, and one for a very large amount, had occurred, but on inquiry we learn from well-informed parties that the report is unfounded. A small firm connected with the failure of last week is said to have suspended.

The cash sales of Bonds to-day amounted to 78,000. Prices ran down to 49¾.

For Sept. 30	240,000	49⅞ to	50¼
Oct 31	80,000	48⅝	49
Saturday	95,000	50⅛	

Total sales, 523,000.

The advices received, per Hipparchus, respecting the wheat crop in England, estimate the increase of the crops at five millions of quarters over the crop of last year, and at 2½ millions over an average year: the average price is put down at 55s.

In coal we heard of a sale, one cargo, at 11 patacons.

The Parana, from Paraguay, arrived to-day, but brought no fresher news.

The Rio Negro, from the Uruguay, has not as yet arrived, being behind time last week. She is expected to-morrow.

Some two other sales of wool on contract are spoken of, but the price and names of sellers are reserved.

The new method of killing cattle, patented by General Paez, was exhibited on the Bolsa to-day. The machinery connected with this new enterprise is expected out shortly from the States.

Advices from Montevideo to-day report gold at 154 per cent. premium. Money is very abundant, but the interest rates rule at 12 per cent. per annum, as the banks do very little in discounts. Gold is abundant in Montevideo.

Our special reporter at the South Plaza notes the following sales:—

220 ar. at	51
130 ar.	55
Dry hides—	
315 camp	128
180 Matadero	130
400 at	129
Several lots	124, 127, 128

500 doz. sheepskins, 28, 80, 90, 100, 120, 133. Some good matadero at 125 and 140.

Capones—One troop, very fat, 37. 750 capones 35.

Wheat—At the Boca. 8,000 ar, 200 per fan.

[In our last report of the sale of capones, the quotation should have been "at $30 each," instead of $3.]

PERRY DAVIS' VEGETABLE PAIN-KILLER.

After a trial, by innumerable living witnesses, has proved itself the medicine of the age.—Although there have been many medicinal preparations brought before the public since the first introduction of Perry Davis' Vegetable Pain Killer, and large amounts expended in their introduction, the Pain Killer has continued to steadily advance in the estimation of the world, as the best Family Medicine ever introduced. It is an internal and external remedy. One positive proof of its efficacy is, that the sales have constantly increased and wholly upon its own merits. The effect of the Pain Killer upon the patient, when taken internally in cases of Cold, Cough, Bowel Complaints, Cholera, Dysentery and other affections of the system, has been truly wonderful, and has won for it a name among medical preparations that can never be forgotten. Its success in removing pain, as an external remedy, in cases of Burns, Bruises, Sores, Sprains, Cuts, Sting of Insects, and other causes of suffering, has secured for it such a host of testimony, as an almost infallible remedy, that it will be handed down to posterity as one of the greatest medical discoveries of the nineteenth century.

THE "GLYCERINE" DIP,

FOR SHEEP AND LAMBS,

FREE FROM ARSENIC, MERCURY, MINERAL AND OTHER POISONS.

DEADLY TO ALL PARASITES INFESTING THE SKINS OF SHEEP AND OTHER ANIMALS.

THIS PREPARATION is destined to supersede the Compounds hitherto Advertised, and which have a tendency to destroy Animals, injure the Men engaged in Dipping, and weaken the Wool by their caustic and reducing properties.

The "GLYCERINE" DIP can be used with perfect safety at any Season of the Year, and has been found in practice invaluable for the following purposes:—

I.—In Curing Scab, Killing Acari, Fags, Ticks, and other Parasites which attack the Sheep.

II.—In strengthening and adding lustre to the Wool.

III.—In Washing Sheep shortly before Clipping, leaving the Fleeces in a pure state.

IV.—In Dipping Lambs, even whilst suckling ewes, as they cannot be injured by the Material.

V.—In Dipping Rams at any Time of the Year, without danger of producing the excoriations which always follow the use of other Dips, especially in the Autumn Season.

SOUTH AMERICA VERSUS THE WORLD.

PENEDO'S VEGETABLE SYRUP,

THE GREATEST MEDICAL DISCOVERY OF MODERN TIMES!

HAS CURED THOUSANDS!

FAREWELL, A LONG FAREWELL, to Consumption, Affections of the Chest, Hooping-Cough, Chronic Bronchitis, and Asthma.

All sufferers from these dangerous Diseases will experience immediate relief even in the most desperate cases.

Several eminent Members of the Medical Profession, whose testimony may be relied upon with the most perfect confidence, have obtained the most satisfactory results in cases of Consumption by the use of this valuable specific—in fact,

THE SYSTEM OF THE PATIENT UNDERGOES A COMPLETE TRANSFORMATION.

Professor PENEDO feels assured that the above-mentioned discovery will always maintain a vast superiority over all other Preparations, as it is generally known that these invariably contain a large quantity of mineral matter, which is most hurtful to the human frame.

This SYRUP is prepared solely from one of those valuable vegetable productions for which the surrounding country of the Brazils is so justly famed.

The annexed Testimonial has been received, and is one of many thousands, testifying to the medicinal virtues of Penedo's Syrup:—

"I, the Undersigned, Chevalier of the Imperial Order of the Cross, of the Order of the Rose, and of the Military Order of San Benito d'Aviz, Brigadier Surgeon-in-Chief of the Military Board of Health, all by the grace of His Majesty the Emperor, qualified in Medicine and Surgery by the Academy Medico-Chugica of Rio de Janeiro, &c., certify that I have employed with very happy results among different classes of Patients, both civil and military, the Syrup, so-called, of Penedo, in Pulmonary Affections, even in infirmities decided to be in the incipience of Tuberculous Consumption, the symptoms which characterised the disease completely disappearing with its use. One case presented itself to me among many others, although more marked by the extraordinary circumstances connected with it: it was that of the illustrious Señora D. Joaquina B. de Carvalho Affonso, lady of the illustrious Sr. J. F. Affonso, residing in the Rua du Cadeia corner of the Misericordiæ, who, being considered in Consumption by an affection of the lungs, is to-day radically restored. The above is the truth, to confirm which I pass the present Certificate, in order that the illustrious Sr. Penedo, Pharmaceutical Chemist, may make whatever use of it he may think fit.

(Signed), "IGNACIO MANUEL DOMINGUEZ.

Kemp's Vegetable Worm Pastiles.

I Certify that I have for many years been physician in the Hospitals of this city, and have had occasion to test the effects of "Kemp's Worm Pastilles." My experience causes me to consider them one of the best remedies for the expulsion of Worms. They are safe and effective, both for children and adults.

MIGUEL DE ZAYAS, M.D.

Puerto Principe, Cuba, Nov. 1, 1862.

I Certify that I have prescribed, on different occasions in my civil practice, "Kemp's Worm Pastilles" with good results. I consider them an excellent specific in the diseases produced by Worms. Their pleasant taste and smell is an important virtue in prescribing them for children.

FRANCISCO GOICOECHEA, Professor of Medicine and Surgery, and Chief Medical Director in the Military Hospital, Bolivar City.

Venezuela, July 1, 1862.

I Certify, that I have many times prescribed "Kemp's Vegetable Worm Pastilles," and always with the same satisfactory results, for all kinds of Worms. They are easily administered, and are a safe remedy in such diseases.

FRANCISCO CASALS, M.D.

Matanzas, Cuba, May 10, 1862.

I Certify, that "Kemp's Vegetable Worm Pastilles" is one of the most efficacious remedies for removing and destroying Worms. I was for a long time a sufferer from those dangerous vermin, but the "Pastilles" have effectually relieved me, and my health is now entirely re-established. I shall always strongly recommend this most agreeable of medicines.

LUIS FLORES.

Lima, May 26, 1862.

KEMP'S VEGETABLE WORM PASTILLES Are safe for the most delicate child. They never fail in removing Worms of all kinds, when used according to directions.
